

# Secure Your Home Checklist

## Entry Point Assessment

- ☐ Check all exterior doors for solid frames and working locks
- ☐ Inspect windows for secure latches and intact glass
- ☐ Secure garage doors and interior garage access points
- Lock and monitor secondary entrances like side or back doors
- Verify sliding doors have secondary locking measures

## Common Vulnerabilities

- ☐ Unlocked or rarely used doors and windows
- ☐ Poor exterior lighting around entry points
- ☐ Cameras placed too high, too low, or blocked
- ☐ Shared or outdated user codes
- ☐ Lack of monitoring or system testing

## Smart Home Integration Guide

- ☐ Control your system from your phone or tablet
- ☐ Set alerts for doors, motion, and cameras
- ☐ Automate lights, locks, and thermostats
- ☐ Create schedules for home and away modes
- ☐ Integrate cameras for real time viewing and recordings

## Security Layers Explained

- ☐ Perimeter protection with doors, windows, and outdoor lighting
- ☐ Detection layer using motion sensors and glass break sensors
- ☐ Visual deterrence with visible cameras and signage
- Monitoring layer for professional response
- User access controls with individual codes and permissions

## Cost Effective Security Solutions

- ☐ Focus first on doors, windows, and primary entry points
- ☐ Use motion activated lighting instead of constant lighting
- ☐ Upgrade key areas before expanding coverage
- Reuse compatible existing equipment when possible
- Schedule regular system checkups to avoid costly failures
